HNS in Education Design

The Semantic Coordinate Layers of Learning

Unified Learning Framework

- Unified Learning Framework
- Organized Curriculum Design

Personalized Adaptive Growth

- Personalized Adaptive Growth
- HumanOS as the OS for Education

864

144

36

Building the complete framework for integrated learning.

HNS-36 for Learning Structure

Learner Internal Structure

- Cognition
- Affect
- Behavior

Instructional Design

- Learning Objectives
- Learning Activities
- Assessment

36 Base Coordinates

Learning Structure Layer

HNS-36 defines the minimal semantic units of learning.

Each coordinate represents a stable learning meaning state.

Learning objectives, activities, and assessments align through the 36-grid.

HNS-144 for Curriculum Design

Curriculum Components

- Scope
- Sequence
- Continuity

Instructional Modes

- Conceptual
- Procedural
- Experiential
- Reflective

Curriculum Design Layer
HNS-144 Structure Map

HNS-144 expands learning structure into curriculum architecture.

Each coordinate integrates layer, category, and mode.

Curriculum alignment is achieved through the 144-grid.

HNS-864 for Personalized Learning

Learner State Mapping

- Meaning State
- Learning Trajectory
- Cognitive Profile

AI-Adaptive Learning

- Dynamic Feedback
- Personalized Pathways
- Metacognition Support

HNS-864 maps the complete semantic state of each learner.

AI systems adapt instruction through semantic coordinates.

Personalized learning emerges from the 864-grid alignment.

HNS-Education Integration Map

Education System Integration

- Institutional Design
- Curriculum Alignment
- Learning Analytics

Personalized Learning

HumanOS for Education

- Semantic Mapping
- Adaptive AI Interface
- Global Standardization

HNS integrates education through semantic coordinates.

HumanOS serves as the operating system for learning.

From structure to personalization, education becomes a semantic system.
