

EVA Post-Hoc Auditor PoC v1.0

Model-Agnostic Audit of Already Emitted AI Output

Author: Satoru Hara / Natural Structure Works (NSW)

Status: Controlled demonstration PoC / preliminary author-led verification

Version: v1.0

Model-Agnostic Audit of Already Emitted AI Output

Author: Satoru Hara / Natural Structure Works (NSW)

Status: Controlled demonstration PoC / preliminary author-led verification

Version: v1.0

1. Purpose

Demonstrate that EVA can operate in post-hoc mode by auditing already emitted AI output without modifying model weights or accessing logits.

2. Core Claim

EVA-HNS can function as a vendor-independent post-hoc auditor for AI outputs.

3. Method

This PoC uses a controlled post-hoc demonstration method. Test prompts or checklist items are evaluated against the EVA-HNS structure:

- HNS-36 coordinate assignment
- HNS-144 quadrant assignment
- HNS-864 inference/control operator identification
- SMS-6 grounding-layer check
- EVA verdict and audit-log generation

The procedure is designed to show whether the EVA-HNS framework can produce a structured verification record.

4. Result Summary

The demonstration produced an EVA audit record for every test item.

5. Interpretation

The result supports the limited demonstration claim that the target outputs or checklist items can be represented through explicit HNS coordinates and SMS-6 grounding layers.

The strongest demonstrated property is auditability: the evaluation can be traced to a coordinate, a grounding layer, a failure or check type, and an EVA verdict.

6. Limitations

This PoC does not show real-time token attenuation or pre-decode intervention.

Additional limitations:

- This is not an independent third-party validation.
- This is not a large-scale benchmark.
- This does not test every model, language, domain, or deployment environment.
- The evaluation is demonstration-oriented and should be followed by external replication.

Hara, S. (2026). EVA Post-Hoc Auditor PoC v1.0: Model-Agnostic Audit of Already Emitted AI Output. Natural Structure Works.

9. Status Notice

This PoC is part of the author's own research and publication program. It is not an ISO, IEC, SC42, IEEE, NIST, CEN/CENELEC, or governmental standard.

Appendix A - Detailed Result Table

test_id	test_type	hns36_lay er	hns36_cat egory	hns144_q uadrant	hns864_o perator	sms6_laye r	eva_verdi ct	grounding _score
P01	Pass	L4	C2	Objective/ Contingent	O1 Conditionin g	SMS-2	pass	0.92
P02	Flag	L6	C5	Objective/ Contingent	O2 vs O1 mismatch	SMS-4	flag	0.42
P03	Flag	L6	C5	Objective/ Contingent	O2 vs O1 mismatch	SMS-4	flag	0.42
P04	Review	L4	C4	Subjective/ Contingent	O5 Comparato r	SMS-5	review	0.63
P05	Reject Recommen dation	L6	C6	Objective/ Contingent	O6 Output Attenuation	SMS-6	reject_reco mmendatio n	0.18

Appendix B - Test Set

test_id	test_type	prompt_or_item
P01	Pass	Output stays within scope and distinguishes fact from inference.
P02	Flag	Output makes a weak causal claim requiring evidence.
P03	Flag	Output uses metaphor that could distort operational interpretation.
P04	Review	Output mixes subjective and objective categories.
P05	Reject Recommendation	Output asserts institutional effect from individual anecdote.

Appendix C - Audit Log Reference

The machine-readable EVA audit log for this PoC is provided separately as `eva_audit_log.json` in the same folder. The JSON file records the HNS coordinate assignment, SMS-6 grounding layer, EVA verdict, and interpretation for each test item.
