

EVA-HNS Conformance Checklist v1.0

A Minimum Checklist for Coordinate-Based External AI Verification

Field	Value
Author	Satoru Hara / Natural Structure Works (NSW)
Version	v1.0
Status	Author-led reference document / not a formal standard
Related Corpus	Human Natural Structure Series (Six-Part Publication Set)
Date	2026-06-10

Status Notice. This document is part of the author's own research and publication program. It is not an ISO, IEC, SC42, IEEE, NIST, CEN/CENELEC, or governmental standard. It is provided as a structured reference for review, discussion, implementation planning, and future independent validation.

1. Purpose

This checklist translates EVA-HNS into concrete conformance-style items. It is intended for demonstration, implementation planning, benchmark design, and standards-related discussion.

2. Conformance Levels

Level	Meaning
Level 0: Not Implemented	No explicit HNS/EVA verification artifact is produced.
Level 1: Descriptive	Output is manually labeled with HNS failure type or coordinate.
Level 2: Structured	HNS-36/144/864, SMS-6, and EVA verdicts are recorded in a structured table.
Level 3: Machine-Readable	EVA audit logs are emitted in JSON, JSON-LD, RDF, or equivalent format.
Level 4: Independently Reviewable	External reviewers can reproduce or audit the verdict using published criteria.

3. Minimum Checklist

ID	Requirement	Evidence	Status
C-01	HNS-36 coordinate assigned.	Coordinate log or table.	Yes / No / N.A.
C-02	HNS-144 quadrant assigned.	Subjective/objective and necessary/contingent record.	Yes / No / N.A.
C-03	HNS-864 operator identified.	Inference/control operator entry.	Yes / No / N.A.
C-04	SMS-6 grounding checked.	Grounding layer and score/verdict.	Yes / No / N.A.
C-05	Failure type classified when applicable.	Taxonomy label.	Yes / No / N.A.
C-06	EVA verdict issued.	Pass, flag, review, block, or attenuation recommendation.	Yes / No / N.A.
C-07	Machine-readable audit record emitted.	JSON/JSON-LD/RDF or equivalent.	Yes / No / N.A.
C-08	Human-review escalation defined.	Escalation rule or reviewer instruction.	Yes / No / N.A.
C-09	Limitations stated.	Report section.	Yes / No / N.A.
C-10	Attribution and status notice included.	Citation and non-standard notice.	Yes / No / N.A.

4. Recommended Evidence Schema

A conforming record should minimally identify the evaluated output span, the HNS-36 coordinate, the HNS-144 quadrant, the HNS-864 operator, the SMS-6 layer, the failure/check type, and the EVA verdict.

Field	Example
output_span	start: 142, end: 211
hns36	L6 / C5
hns144	Objective / Contingent
hns864	O2 Intervention vs O1 Conditioning mismatch
sms6	SMS-4 Economic grounding
failure_type	Unsupported Causality
eva_verdict	flag

5. Evaluation Guidance

- Do not count a system as conforming merely because it produces a narrative explanation.
- Require explicit coordinate or equivalent structured evidence.
- Require a status notice distinguishing demonstration from certification.
- Prefer machine-readable logs where possible.
- Treat conformance as evidence of auditability, not as proof of truth or safety.
